A healing wonder for nasal catarrh, sore throat and sore eyes. Economical. This extraordinary cleaning and germicidal powder. Sample Free. Ship all orders prepaid by mail. The Paxtine Co., Boston, Mass.

"A SPLENDID TONIC"

Jays Hixson Lady Who, On Doctor's Advice, Took Cardui And Is Now Well.

Hixson, Tenn.—"About 10 years ago I was..." says Mrs. J. B. Gadd, of his place. "I suffered with a pain in my left side, could not sleep at night with this pain, always in the left side..."

My doctor told me to use Cardui. I took one bottle, which helped me and after my baby came, I was stronger and better, but the pain was still there.

I at first let it go, but began to get weak and in a run-down condition, so I decided to try some more Cardui, which I did.

This last Cardui which I took made me much better, in fact, cured me. It has been a number of years, still I have no return of this trouble.

I feel it was Cardui that cured me, and I recommend it as a splendid female tonic. Don't allow yourself to become weak and run-down from womanly troubles. Take Cardui. It should surely help you, as it has so many thousands of other women in the past 40 years. Headache, backache, sideache, nervousness, sleeplessness, tired-out feeling, are all signs of womanly trouble. Other women get relief by taking Cardui. Why not you? All druggists.

Love of Music Among Birds.

The theory advanced by Darwin that the singing of birds is merely a sexual characteristic, and that their power of song has been developed because only the best singers were propagated, is no longer accepted by naturalists. Thus Henry Oldys holds that birds are really motivated by a love of music similar to that experienced by human beings. In support of this contention he cites the fact that birds will sing when happy and be quiet when unhappy and that they will listen to and imitate superior singers of their own kind. Canaries are trained by other canaries of superior musical ability which are often worth large sums.

Willows Mentioned in Bible.

Willows are mentioned in the Biblical books of Leviticus 27, Job 11, Isaiah 14, Psalms 137. The tree upon which the captive Israelites hung their harps was the Salix Babylonica. This tree is abundant on the banks of the Euphrates.

FIERCEST FIGHTING OF WAR

Russia's Military, Economic and Political Troubles Are Disturbing—
Pope's Peace Proposals Discussed—
President Wilson Regulates
the Prices of Coal
in America.

By EDWARD W. PICKARD.

Civilians far from the seat of war wondered why the allies did not deliver their smashing blows at the Kaiser at the same time, giving him no opportunity to shift his troops from one front to another, instead of taking turns in hitting him. That is just what they did last week, for British, French and Italians all began offensives that developed into the most furious battles of the war so far. The Anglo-French forces near the Belgian coast vigorously renewed the attacks begun the previous week and pushed forward. The British hurled themselves against the defenses of Lens and forced their way further into the outskirts of that coal center, repulsing all counter-attacks. General Petain's men attacked along the Chemin des Dames, and then delivered a series of smashes at the Germans in the Verdun sector, taking the twin summits of Dead Man's hill and other strong positions that the crown prince had held for a year and more. In Alsace there was lively fighting. At the same time the Italians were carrying on a monster offensive against the Austrians along the entire Julian, Isonzo and Carno fronts, from Piava to the sea. The Austrian defenses were leveled by a terrific artillery fire, new crossings of the Isonzo were forced, and Cadrona's troops advanced considerably on their way to Trieste despite the difficulties of the terrain. Wednesday the British again attacked fiercely in the Ypres region and after a bloody combat succeeded in taking important positions along the Ypres-Menin road. A little further north, in the blood-soaked Langemark-Fresenberg sector, they hit the enemy hard in an effort to take the ridge, known as IMU 35, where the Irish made a gallant but losing fight the week before.

Germans Resist Stoutly.

The Germans have massed immense numbers of troops at the points of attack and are resisting desperately and making almost continuous counter-attacks, but up to the time of writing they had been unable to regain any of the lost ground.

All the allied armies took great numbers of prisoners and guns and inflicted terrible losses on their hard-fighting opponents, and they themselves lost many men, for the attacks were delivered with rather less than the usual regard for life. In Flanders and France the tanks played a large part, and on all fronts the aviators were extraordinarily active and bold. The Italians introduced one novelty. When their assaulting troops moved forward they were preceded by a squadron of airplanes forming the first line and using their machine guns on the Austrians at short range.

General Pershing and other American officers were present at the new battle of Verdun.

Disturbing News From Russia.

The week's news from Russia was rather disquieting. Petrograd presented to America and the entente allies a statement indicating that Russia would be unable to continue in the war unless immediate, adequate and continuing assistance were given. She has no intention of making separate peace, but says she cannot keep up the fight unless her associates furnish...

The threat of the I. W. W. to tie up the industries of the West, including the harvest, if their leaders were not released was met promptly by the arrest of a lot more of the gang, and the great strike fizzled out miserably. No sooner was this trouble passed than the machinists and boilermakers, employed in the Atlantic coast shipyards, were called on to quit. This of course would put a stop to vast amounts of government naval work, and the United States mediators got busy at once. Several thousand men stopped work, but most of them either pledged Secretary Daniels that they would not quit, or delayed action until a vote could be taken.

President Cuts Coal Prices.

Having started Mr. Hoover well on the food conservation campaign, President Wilson last week turned to the almost equally pressing coal problem, which for several weeks had been exercising the wits of various state administrations. Having studied the production cost figures supplied him by the trade commission, the president issued an executive order fixing a tentative scale of prices for bituminous coal at the mines in nearly all coal producing districts of the country. These prices in some instances are more than \$1 a ton below the voluntary prices fixed at the conference last June. The scale is subject to change when a method of administering the fuel supplies of the country has been determined and put into operation.

Later in the week the president named Dr. Harry Garfield fuel administrator, fixed anthracite prices for producers and jobbers and set a limit on profits to be made by bituminous wholesalers.

The senate spent most of the week in consideration of the revenue bill. Among other things it increased the finance committee's income tax provisions by a total return to the treasury of \$73,000,000, adopting unanimously the Gerry amendment, which adds \$40,000,000 to the returns from incomes of half a million and over.

Japan's Mission in Washington.

The imperial Japanese mission was formally received in Washington by Secretary Lansing and other government officials on Wednesday. Its head, Viscount Ishii, made it clear that the mission has come not on a commercial or political errand, but to decide on how the two nations can best cooperate, in both a military and an economic sense, in carrying on the war.

The neutral countries of Europe—so-called, though no country there is any longer really neutral—are still trying to get around the American embargo that is so painful to their pocketbooks and their stomachs; but the indications are that unless they quit supplying Germany with foodstuffs, their suffering will only increase. Switzerland and Holland, which depend on Germany for coal, have contracted to lend the Kaiser large sums in return for the privilege of continuing to buy their fuel from his country.

Hungary took a real step toward democratization and freedom from German and Austrian influence in the appointment of Dr. Alexander Wekerle as Hungarian premier, to succeed Esterhazy. The new premier is popular, Democratic, a financial genius and is known to be no friend of Germany. The new nationalist movement in Hungary has attained great strength, and it is said King Charles is in complete harmony with the desires of the nation.

German aviators distinguished themselves last week by another raid on English coast towns in which 11 persons were killed, and by deliberately bombing two French hospitals behind the Verdun lines and then shooting down the doctors and nurses, who were trying to rescue the wounded soldiers from the resulting conflagration. It would seem that the chivalry of aviators is one-sided.

Negro soldiers of the Twenty-fourth United States Infantry, stationed at Houston, Tex., as guards during the construction of Camp Logan, started a serious race riot, in which a dozen white civilians, police officers and National Guardsmen, and a number of negroes were killed, and more than a

out of Moldavia within three weeks and last Monday the Germans began an offensive in the Riga region that forced the Slavs back toward that city. At the south end of the line the Romanians still are making valiant effort to hold back the invaders. There is no longer any doubt of the bravery of the Russians or of their desire to keep on fighting the common enemy of the world, but it seems that they cannot themselves surmount the great economic obstacles that confront them.

The governmental troubles of Russia also are approaching a crisis. "extraordinary national council" is about to meet in Moscow, the constitutional Democrats, discontentedness men and dismissed generals, are there ready to demand changes. On the other side stand cabinet and the Socialist left. In preliminary discussions Prince Betskoi, Generals Alexieff and Shiloff and others attacked the cabinet excepting only Kerensky, and declared the government had fallen into the hands of corrupt men of Petrograd who think only of their own interests. The Socialist orders that destroyed discipline in the army were bitterly criticized.

As had been foreseen, the peace proposals were received with more than an undercurrent of skepticism by the allies. No definite reply to them has been made at this writing by any government, but representative speakers of the different parties in Germany all indorsed in general the German plan, and it is believed Berlin may go so far as to offer autonomy to Alsace-Lorraine, which of course would not in any degree satisfy France. Austria, too, as was expected, approves the proposals, but insists any settlement must include the abandonment of Great Britain's naval bases at Gibraltar, Malta and the Suez canal. Can one imagine Great Britain willingly dismantling these guardian posts of the route to her immense domains in the Orient? The vociferous assertions of the German press that the pope's proposals were not inspired by Germany and the intimations that they really were due to British suggestions can only be considered as more "bunk" and serve to confirm the suspicion that the plan had its inspiration in Teutonic sources.

German Poison Gas in America

The poison gases emitted by the German press and all the other treasonous agencies in America are not going noticeably less in amount of violence, but Uncle Sam is beginning to apply the antidote with considerable vigor. In many cities "soap box" orators are being gathered in by federal agents and several more rabid have been denied the use of the platform. The German-American press of large cities is still too clever to reject itself to that penalty, but keeps on its present course and some means will be found to stop it. Regrettably it must be said that the large proportion of Germans in America—naturalized—is proving disloyal to their adoption. This is shown in instances as the annual picnic of the Schwabenverein in Chicago, where several days the assembled Germans occupied themselves in denigrating America's entry into the war, the president, sneering at our forces and making fun of the National army. The same is going on all over the land. The Teutons get together, but they are not reaping a harvest of themselves, for the men of justice are coming to the aid of the words and acts. It is common belief that the great mass of Americans are truly loyal, and that the more ignorant and disloyal by the falsehoods of secret agents and by the propaganda of the La Follette, the Masons and the Williamsons for whom all nations can blush.

Former Ambassador to the United States, a prominent man four
